PROJECTS

Shoely

Shoely is a Flutter-based e-commerce mobile application designed for selling branded shoes. Powered by Firebase for backend support, it offers features like user authentication, real-time inventory management, secure payments, and a seamless shopping experience. Shoely combines a sleek UI with robust functionality to deliver a modern, user-friendly platform for shoe enthusiasts.

BarberQueue

A mobile application designed to streamline the barber appointment process. Users can view available slots, book appointments, and receive reminders. With Firebase integration, the app supports real-time updates and seamless appointment management for both customers and barbers.

Todo App

A simple yet efficient task management app that helps users organize their daily tasks and stay productive. Built with Flutter and Firebase, this app offers real-time syncing and task reminders, making it easy to manage to-dos across multiple devices.
